

Mexico

Shaping the Gender Summit's regional and global mission

Julia Tagüeña

CONACYT

*Berlin, Germany
November, 2015*

CONACYT

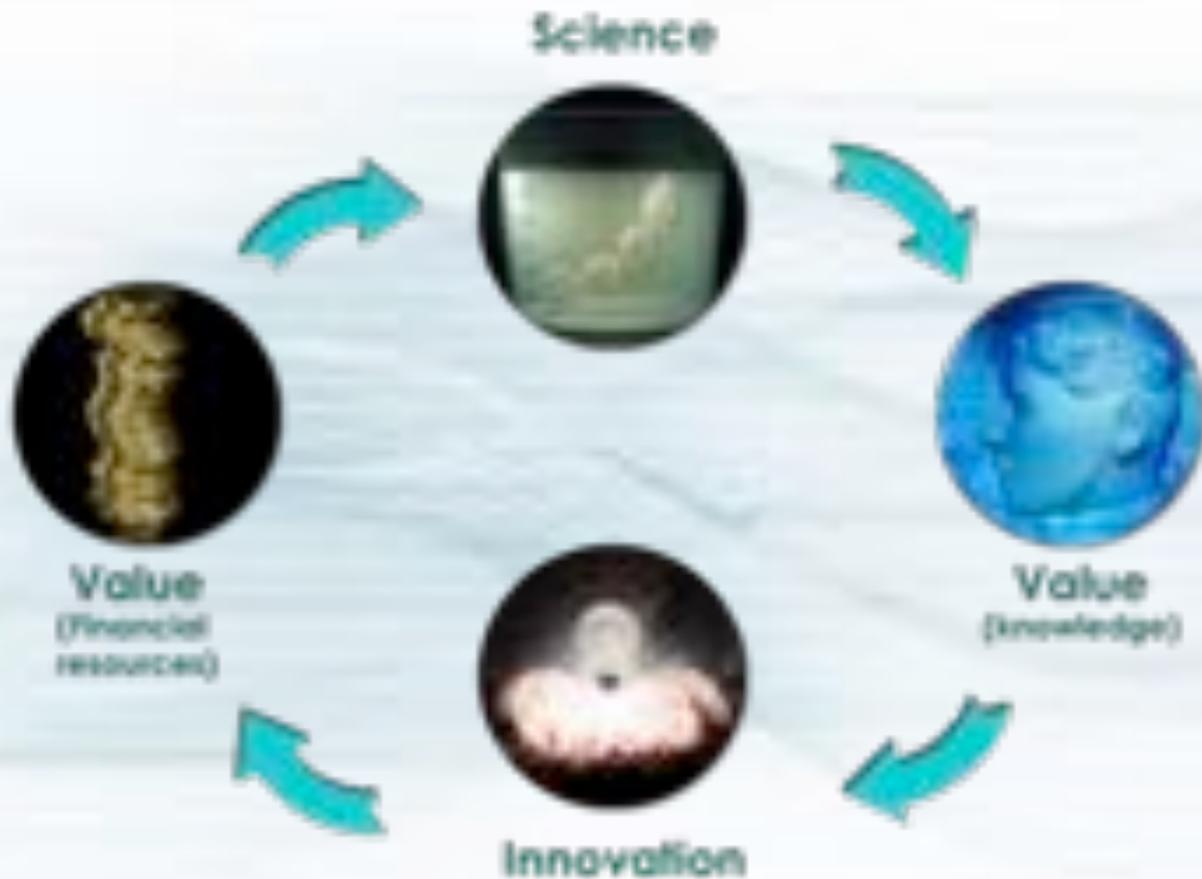

Who are we and what do we do?

CONACYT

The National Council on Science and Technology (CONACYT) is the Federal Executive's advisory body responsible for articulating the federal government's public policies regarding scientific research, technological development and innovation.

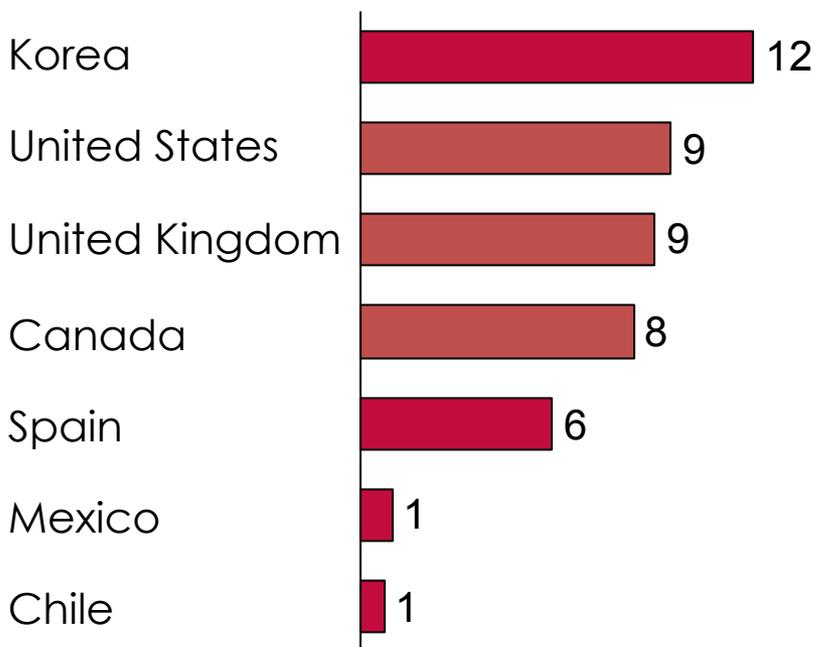

CONACYT actions aim to increase the national productivity to foster economic growth and to enhance the welfare of society.

Virtuous cycle of the knowledge-based economy

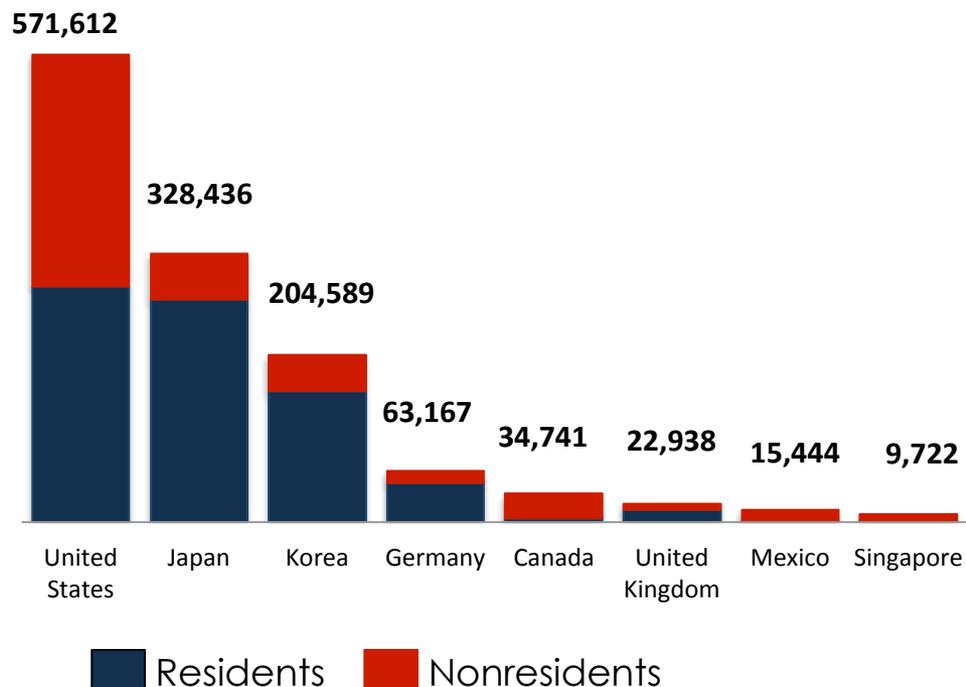

Scientific Knowledge

Total researchers per 1,000 total employment, 2012*

Innovation

Patents by country of residence of the inventor, 2013**

Current situation

Science, Technology and Innovation Policy in Mexico

New Challenges

Special Program of Science, Technology and Innovation (PECiTI)

Objectives

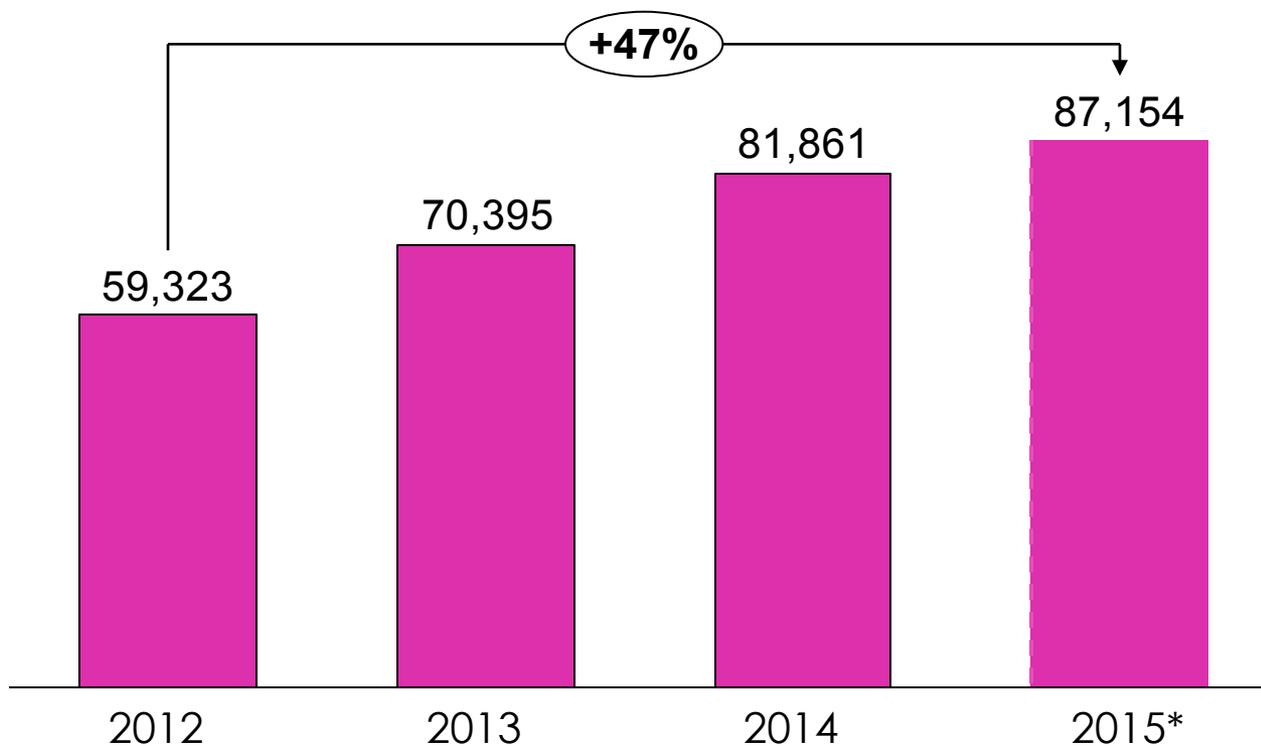

1. Contribute to the growth of **national investment** in science, technology and innovation
2. Formation and strengthening of highly specialized **human capital**
3. Strengthen **regional development**
4. Promote **linkages with the productive sector**
5. Strengthen scientific and technological **infrastructure**

Develop capacities to transit towards a model of knowledge based economy

1. Public investment for ST&I

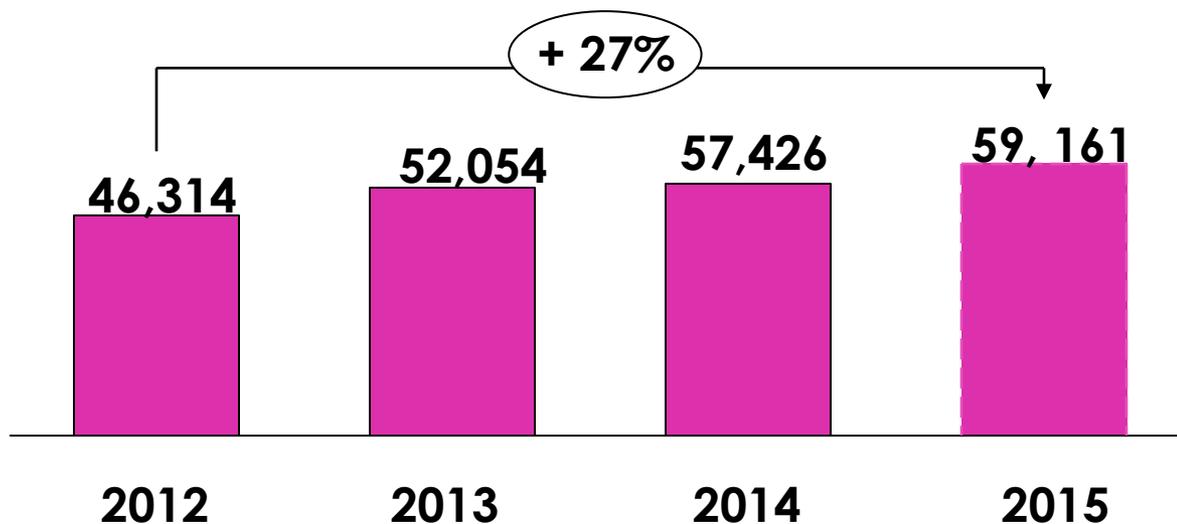

Increasing share of the federal budget for Science, Technology and Innovation (millions of pesos)

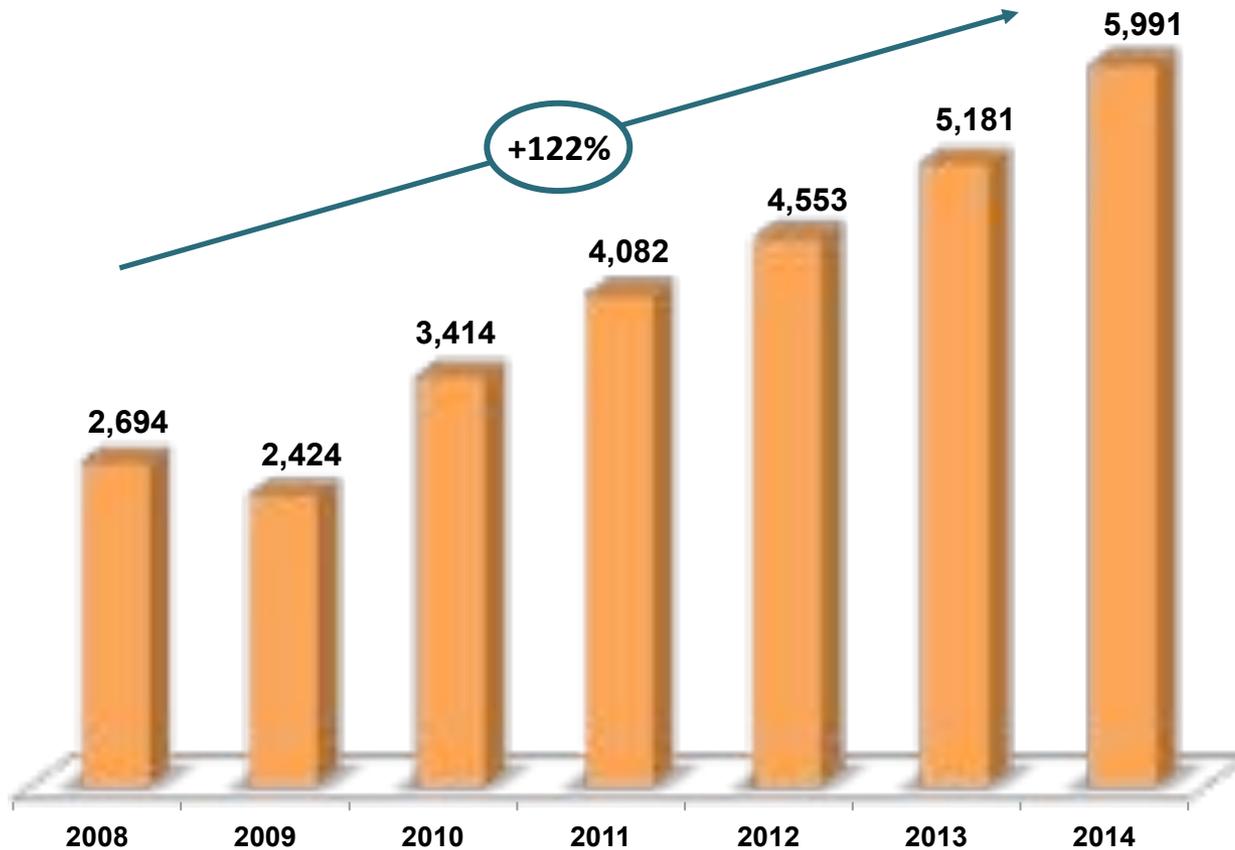

* This budget considers the reduction of 900 MDP, announced by the SHCP.

2. Highly specialized human capital (formation and strengthening)

CONACYT scholarships for students in Mexico

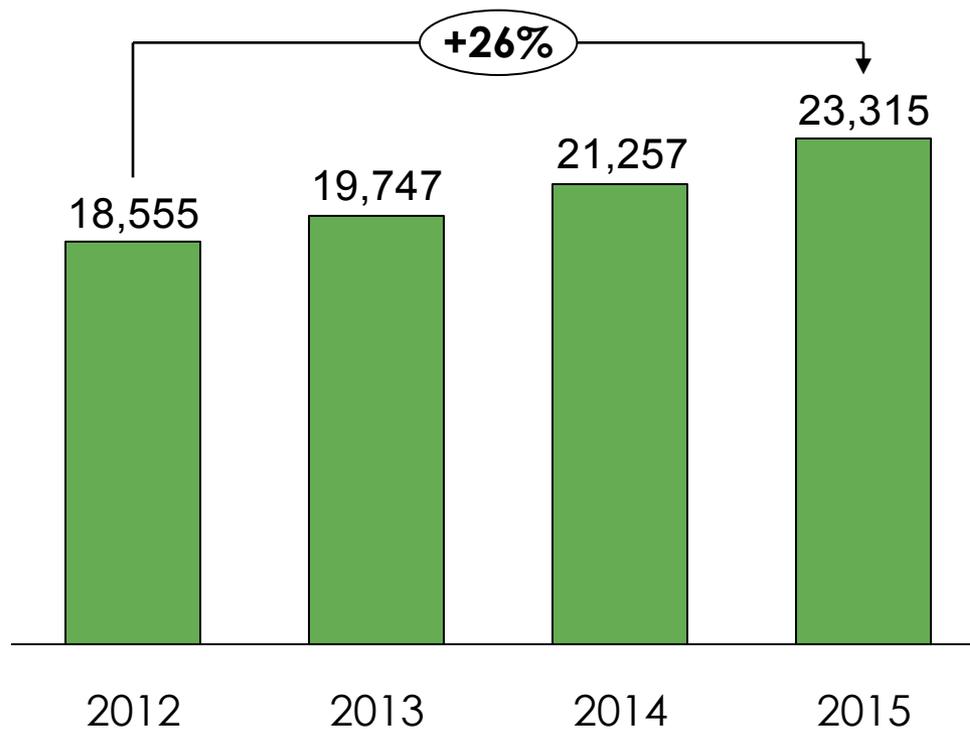

Mexican scholars abroad

Distribution, 2014

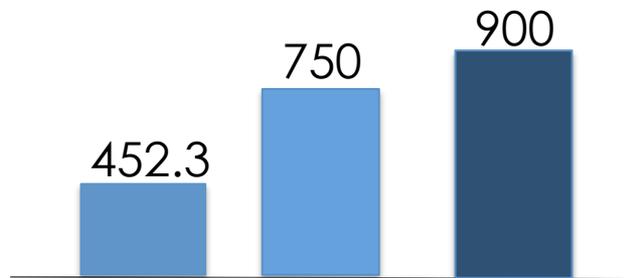

Members of the National Researchers System (SNI)

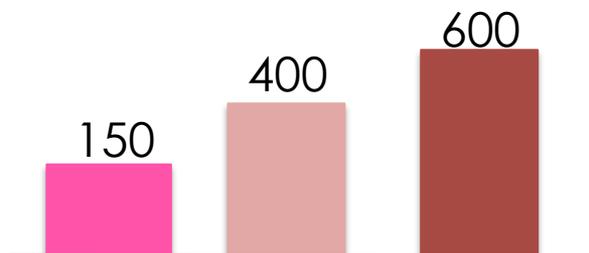

3. Resources for regional development

Budget allocated, 2012-2014 (Millions of pesos)

Mixed funds

Regional funds

Sample project

- Centre of automotive specialisation in collaboration with Universidad Tecnológica

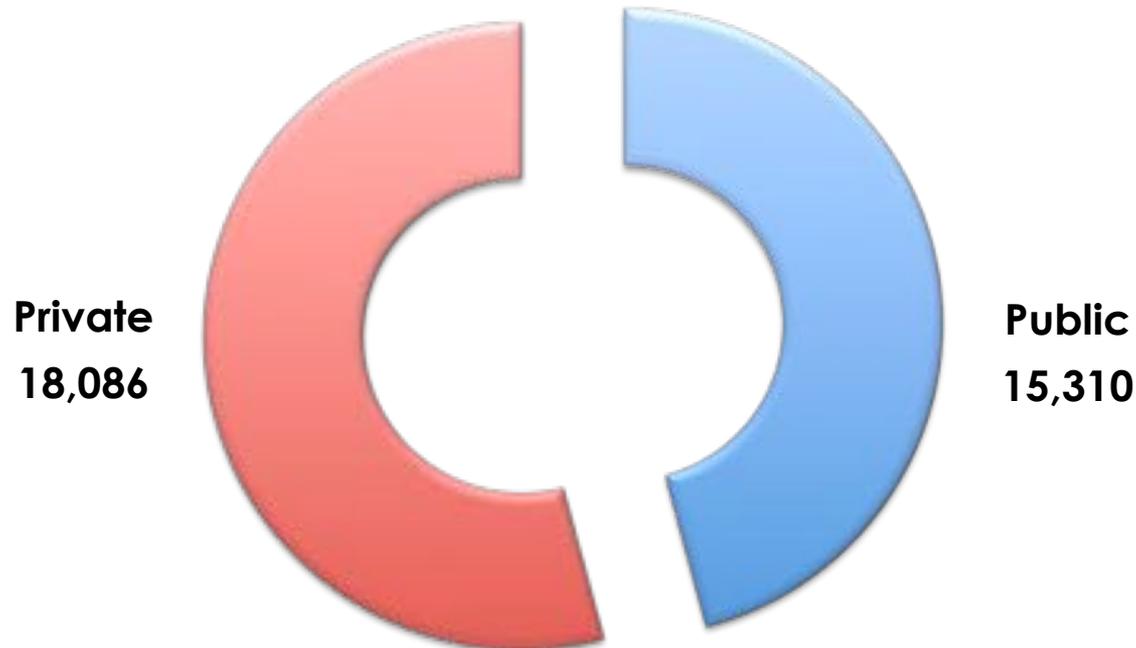

- Exploration and exploitation of unconventional hydrocarbons (shale gas)

4. Strengthen linkages

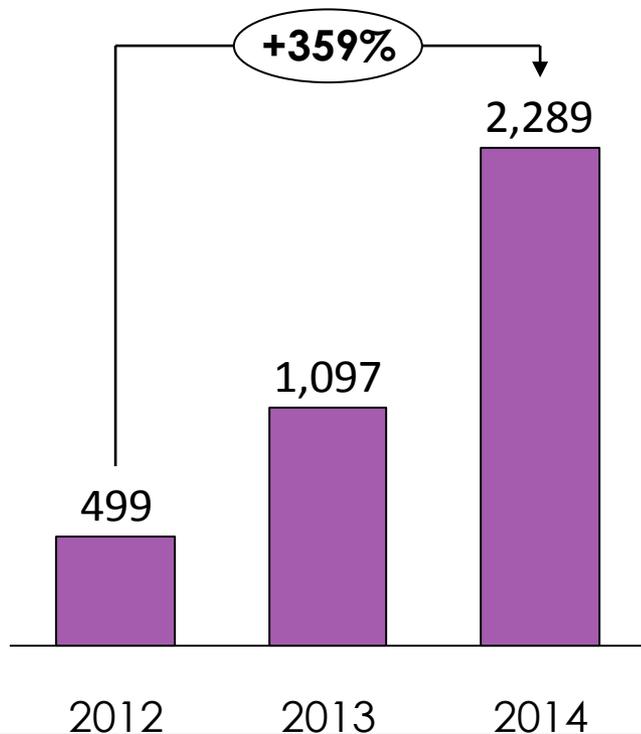

- In 6 years, **\$33,396 millions of MXP** were invested through the Program of Incentives for Innovation (PEI).

Total investment 2009 - 2014

5. Strengthen scientific and technological infrastructure

Infrastructure resources
(millions of pesos)

- Infrastructure in higher education institutions and public research centers
- Strengthening of national laboratories

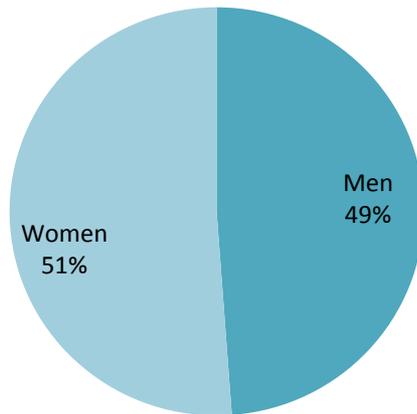

Current situation

Gender statistics in Mexico

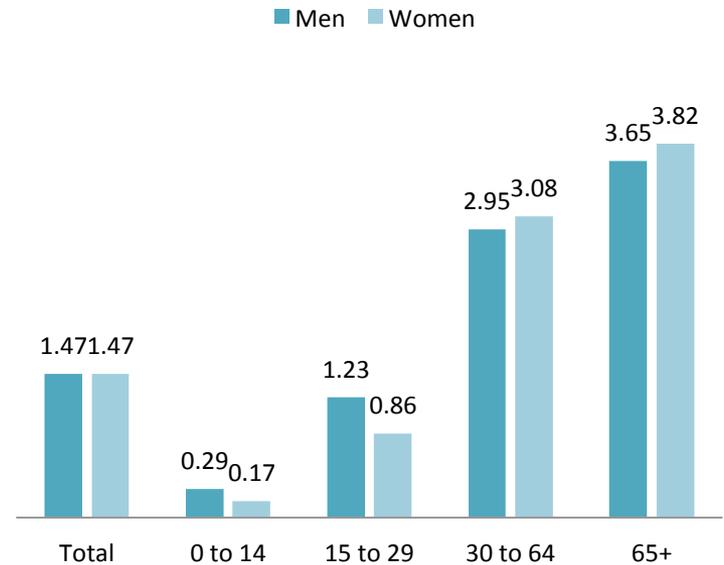

FIGURA 1.1. ESTRUCTURA DEL PLAN NACIONAL EN DESARROLLO 2013-2018

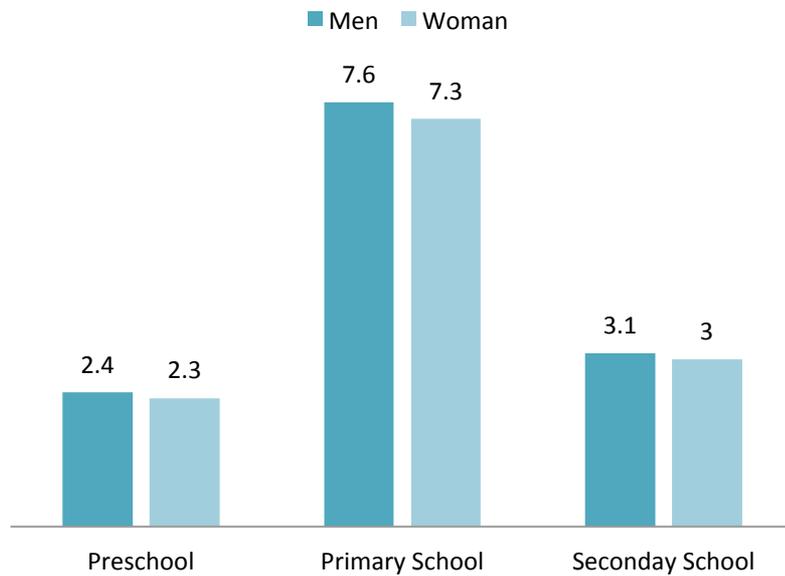

Total Population by sex 2013

Average Annual Growth Rate by Age 2000-2013

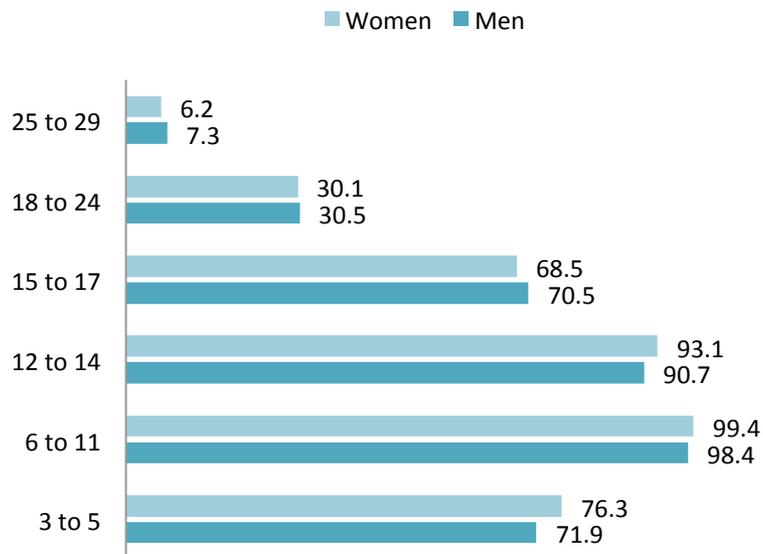

Primary school in enrollment, by education level and gender 2012

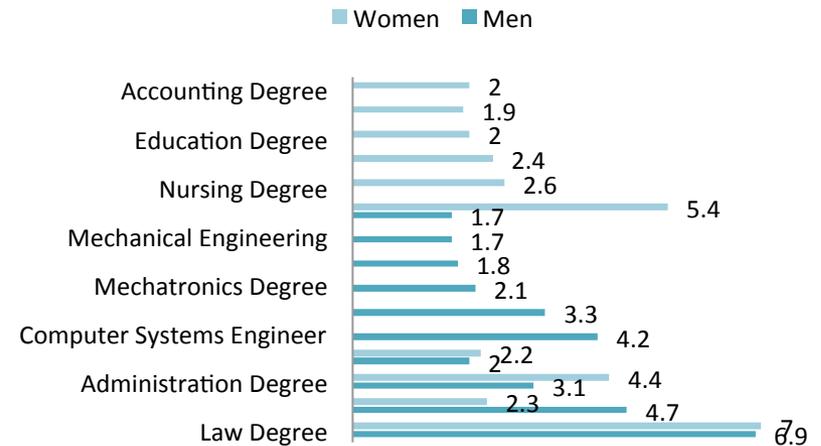

Middle school enrollment, by educational level and gender 2012

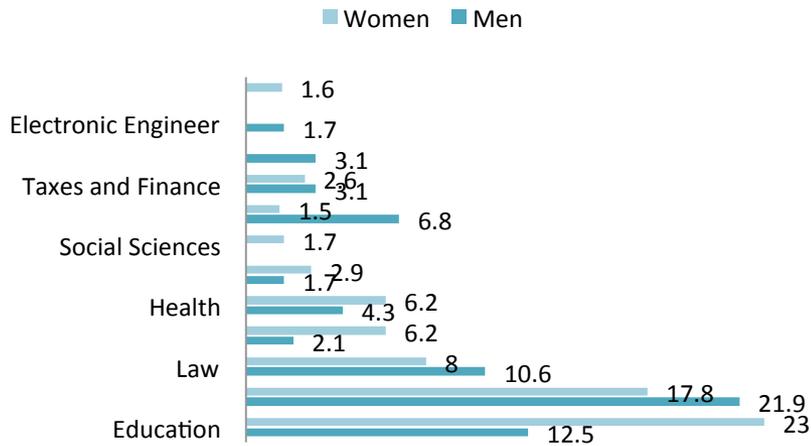

Percentage of population of 3 to 29 years attending school by age group

Percentage distribution of the population by degree, according to 10 most popular degree by sex 2012

Percentage distribution of the graduate students, by gender, according to the 10 most popular specialties 2012

46% women in higher education

Ingeniería y Tecnología	12%	26%	2%

Proyectos apoyados en el PEI, 2015 por Género

Proyectos apoyados en el PEI por Estado, 2015 Por Género y Entidad

- Jalisco, Estado de México, DF, Nuevo León y Guanajuato concentran el 41% de RT mujeres.
- En 5 entidades no hay RT mujeres.

On gender equity...

- In case of pregnancy, women have one extra year in the National System of Researchers.
- Different age limits for applying to hire young researchers (40 men, 43 women).
- Gender equity has been included in the Mexican Science and Technology law (articles 2, 12 and 14). To promote gender perspective and to analyse data related to gender.

Gender Summit 8 – North & Latin America 28 to 29 april, 2016

What to Expect from GS8?

- This Gender Summit aims to highlight how science can be a tool to break all kinds of borders:
 - Gender borders
 - Geographic borders,
 - Disciplinary borders,
 - Educational borders as well as sociocultural and institutional borders
- The kind of science able to break these boundaries comes from an environment of diversity and inclusion, key elements to innovation.

**Science without borders.
Breaking gender,
geographic, disciplinary
and educational borders
through science.**

NSF-NSERC

Mexico City

Mexico, a country of great cultural diversity located in the heart of the American continent, is the host of the eight Gender Summit edition and will introduce the Latin American perspective to Gender Summit movement.

This Summit will move towards an exercise of a multisector dialogue and multidisciplinary reflection that enriches the development of policy instruments for gender equality in the field of science and technology.

Gender Summit 8: Objectives

1. Aim knowledge ownership from a gender perspective.
2. Addressing gender issues in science and technology from a multidisciplinary approach.
3. Promote an increase in expenditure on Scientific and Experimental Development Investment in the region.
4. Add the Latin American voice to the Gender Summit movement.

Themes. Gender, inclusion and multisector approach .

- | | |
|---------|--|
| Theme 1 | Education/ Women role In Science and Technology
Development / Scientific achievements/ |
| Theme 2 | Sustainable development /Environment /Climate change/
Prevention of natural disasters/ Food security |
| Theme 3 | Public Health/Bioethics/ regional epidemics/vaccines/
reproductive education/vulnerable population/ indigenous
communities/ emergency preparedness |
| Theme 4 | Entrepreneurship / creative economies / funding of social
innovation projects/IT/ |
| Theme 5 | Citizen security/ new challenges/Migration/ Humanitarian
response to disasters: epidemics, natural disasters, armed conflict,
migration. |
| Theme 6 | Gender and science and technology / Critics / Inclusion of
multidisciplinary approaches /Current Policies/ Next Steps |
